SUMMARY

Computer Science (Software Engineering) graduate seeking an IT Support Engineer internship to gain hands-on industry experience. Knowledge of computer networking, IP addressing, subnetting, static routing, Cisco Packet Tracer, Windows, and basic Linux, supported by academic projects and CCNA studies. Strong interest in technical support, troubleshooting, network administration, and continuous learning.

EXPERIENCE

1. CCNA Networking Training — 3 Months

NetworkGeek

06/2026 - Present online

- Developed a strong foundation in computer networking through structured CCNA learning and practical network configuration exercises.
- Studied networking concepts including LAN/WAN, network devices, OSI model, TCP/IP, Ethernet, and Cisco IOS basics.
- Practiced configuring routers and switches and establishing basic network connectivity using Cisco Packet Tracer and network simulation labs.

IP Addressing, Subnetting & Network Configuration

NetworkGeek

07/2026 - Present online

- Gained practical knowledge of IP addressing and network configuration through hands-on lab exercises.
- Practiced IPv4 addressing, subnet masks, subnetting, default gateways, and assigning IP addresses to PCs and routers.
- Configured multiple devices and tested communication between different network segments in simulated network environments.

Routing & Network Troubleshooting

NetworkGeek

07/2026 - Present online

- Built practical understanding of routing concepts and troubleshooting through hands-on CCNA laboratory exercises.
- Configured and tested static routing between multiple routers and verified communication between different networks.
- Practiced identifying connectivity issues, checking routing tables, verifying configurations, and troubleshooting basic network problems.

EDUCATION

Higher National Diploma (HND) in Computing

London Metropolitan University

04/2024 - 07/2026 Esoftmetro campus,kurunegala

BSc (Hons) Computer Science (Software Engineering)

Kingston University

09/2025 - 08/2026 Esoftuni, Kandy

PROJECTS

Hospital Management System

Developed a Java-based hospital management system to manage patient, doctor, appointment, and hospital-related information through a structured application.

Technologies: Java
GitHub: [https://github.com/rilwan000/Hospital-Appointment-system.git]

Scanned with CamScanner

Medical Lab Website

Created a responsive medical laboratory website with pages for laboratory services, information, and user interaction, focusing on a simple and user-friendly interface.

Technologies: HTML5, CSS3, JavaScript
GitHub: [https://rilwan000.github.io/RealMade-Madical_Lab/]

Open Weather App

Developed a weather application that provides weather-related information using a user-friendly interface and programming technologies across multiple platforms.

Technologies: Dart, Swift, HTML, C++
GitHub[https://github.com/rilwan000/Openweath erApp.git]

SKILLS

TECHNICAL SKILLS

- IT Support & Troubleshooting
- Computer Networking
- IP Addressing & Subnetting
- Static Routing
- Cisco Packet Tracer
- Windows
- Basic Linux
- Java
- HTML
- CSS
- JavaScript

SOFT SKILLS

- Communication
- Teamwork
- Time Management
- Adaptability

CERTIFICATIONS & TRAINING

CCNA — Networking (NetworkGeek)

- Completed approximately 3 months of structured CCNA learning with practical network configuration and troubleshooting exercises.
- Covered IP addressing, subnetting, switching, routing, Cisco IOS, static routing, and basic network troubleshooting.

Microsoft Power BI — Certification Course

- Completed training covering Power BI fundamentals, data visualization, data preparation, and basic report development.

Business Analysis Fundamentals — Simplilearn

- Completed introductory training in business analysis concepts, requirements gathering, and basic analytical techniques.
